

Where does Youth Star Fund go?

- For national and international donors Youth Star offers a more sustainable, empowering approach to development in Cambodia, where Cambodians are in control of their own development. Youth Star is an opportunity for a grass-roots, locally-led investment.
- Youth Star's long-term residential approach to volunteering gives better quality results for the volunteer and community.

Volunteers undertake training and development, and have the time to understand their communities and to plan activities that will really help to address their needs.
